# TABLE OF CONTENTS

**Inclusive Instructional Design and UDL Around the World** ......................................................... 1  
Susie Gronseth, University of Houston, United States; Elizabeth Dalton, University of Rhode Island, United States; Radhike Khanna, Om Creations Trust and Shraddha Charitable Trust, India; Boris Alvarez, Irma Iglesias & Paola Vergara, Fellow Group, Chile; Jeanne Carey Ingle & Heather Pacheco-Guffrey, Bridgewater State University, United States; Debra Bauder & Katherine Cooper, University of Louisville, United States; Cindy Anderson, Roosevelt University, United States; Kevin Anderson, University of Michigan, United States; Vivian Intatano, Raja Soliman Science & Technology High School, Philippines; Peggy Semingson & Kathryn Pole, University of Texas-Arlington, United States; Kerry Armstrong, Brenda Boreham & Terri Mack, Strong Nations, Canada; Lisa Harris, Winthrop University, United States; Dave Edyburn, University of Central Florida, United States; Janet Arndt, Gordon College, United States; Britt Tatman Ferguson, National University, United States; Nili Luo, Southwestern College, United States; Lindsay Yearta, Winthrop University, United States  

**MOOC as a way to raise inclusion awareness in society: Portuguese case study** ......................................................... 6  
Manuela Francisco, Luís Filipe, Rita Cadima, Célia Sousa, Catarina Mangas, Graça Seco, Sandra Alves, Renato Coelho & Joana Sousa, Polytechnic Institute of Leiria, Portugal  

**Practicing and prospective teachers’ pedagogical reasoning about using technology in their educational practice: Part 1** ........................................................................................................ 13  
Joke Voogt, University of Amsterdam/Windesheim University of Applied Sciences, Netherlands; Michael Phillips, Monash University, Australia; Ottavia Trevisan & Marina de Rossi, University of Padova, Italy; Anneke Smits, Henk La Roi & Roland Bruijn, Windesheim University of Applied Sciences, Netherlands; Judi Harris & Mark Hofer, William & Mary School of Education, United States; Petra Fisser, Netherlands Institute for Curriculum Development, Netherlands  

**UDL for Inclusive Science Education** ................................................................................................. 17  
Heather Pacheco-Guffrey & Jeanne Ingle, Bridgewater State University, United States  

**The Effectiveness of On-line Practicum Courses in Medical Education** ........................................... 20  
Asmaa Radwan, Indiana University of Pennsylvania, United States  

**Near peer video-based observations: Using student teaching videos to train aspiring school** ......................................................................................................................... 24  
W. Sean Kearney & James Jurica, Texas A&M University San Antonio, United States  

**Trends in Rural Area School Librarian Candidates’ Technology Acceptance and Adoption** ......................................................................................................................... 29  
Haihong Hu, University of Central Arkansas, United States
"It was just doing what you know about and move on, you know, just to survive". A beginning elementary teacher’s story of using technology in the classroom during her first two years. ............................................................... 35
Ya-Huei Lu, East Carolina University, United States

A program for success: A reflective structure to enrich preschool children’s mathematical reasoning .............................................................. 40
Kelley Buchheister, University of Nebraska-Lincoln, United States

The Effects of Gender and Literacy in the Development of Computational Thinking Skills in 6th Grade Students .......................................................... 49
Gerald Ardito, Pace University, United States; Betul Czerkawski, University of Arizona South, United States

Bricklayer: Mathematics through Art and Coding ........................................... 52
Michelle Friend, Paula Jakopovic, Betty Love & Victor Winter, University of Nebraska at Omaha, United States

Changing the Game: Teaching Elementary Mathematics Through Coding .......... 55
Paula Jakopovic, Michelle Friend, Betty Love & Victor Winter, University of Nebraska at Omaha, United States

Using TPACK to Teach #FutureTeachers in an Undergraduate Integrating Technology with Teaching Course ................................................................. 61
Julia Parra, New Mexico State University, United States

Teaching through the eyes of a robot Using Robotic Telepresence to Facilitate Early Field Experiences for Pre-Service Teachers ........................................... 65
Shawn Daley, Michigan State University, United States; Stephanie Murphy, Concordia University, United States

TOPRACE Model: A Practice of Online Instruction ........................................... 71
John Ronghua Ouyang, University of North Florida, United States

Exploring messaging in STEM YouTube Videos ............................................. 76
Laurie O. Campbell, Tara Gibson, Jason Pollack & Stacy Watkins, University of Central Florida, United States

Social Media Closing the Distance in Online Education .................................... 81
Lee Heller, Nova Southeastern University, United States

Justin’s Path to Learning Fractions Through Coding ....................................... 92
Lorraine Jacques, Louisiana Tech University, United States
#SocialMediaEd: Perspectives on Teaching about and with Social Media in Higher Education ................................................................. 97
Christine Greenhow, Michigan State University, United States; Benjamin Gleason, Iowa State University, United States; Daniel Krutka, University of North Texas, United States; Tonia Dousay, University of Idaho, United States; Jeff Carpenter, Elon University, United States

Rocket Roundup ................................................................................................. 101
Scott McKay, Mark Geary, Jim Maloney, Jennifer Nash & Jacob Geary, Dakota State University, United States

What Story Does Your Online Presence Tell? Helping Teacher Candidates Understand the Impact of Their Digital Footprint ................................................. 108
Ricky Mullins, Eastern Kentucky University, United States; David Hicks, Virginia Teach, United States; Todd Ogle, Virginia Tech, United States

Dr. Skateboard’s Action Science and the Masters of Physics ............................... 112
William Robertson, Teacher Education Department, College of Education, the University of Texas at El Paso, United States

Preservice teachers’ decisions on the use of ICTs to teach science during teaching practice ......................................................................................... 120
Thuthukile Jita, University of the Free State, South Africa

Education Students’ Definitions of Creativity in Education: Developing Common Ground to Embrace Shifting Educational Contexts ................................................................. 128
Mia Kim Williams & Letha Mellman, University of Northern Colorado, United States

Recording the World: The Potential of Using Wearable Technologies to Teach Social Studies ................................................................................................. 134
Ricky Mullins, Eastern Kentucky University, United States; Cassidy Hall, University of Idaho, United States; Judith Painter, Salem City Public Schools, Virginia, United States; Melinda Davis, University of Idaho, United States; Jaap Vos, University of Idaho at Boise, United States

Understanding Adolescent Writing on Social Media: A Literature Review ............... 138
Sarah Galvin & Christine Greenhow, Michigan State University, United States

Gamified Mars Learning Lab ............................................................................. 147
Mark Geary & Jacob Geary, Dakota State University, United States

Faculty and students’ perspective towards Active Learning Classroom .............. 151
Ali Rezaei, California State University, United States; Francine Vasilomanolakis, CSULB, United States
Digital Literacy and Perceptions of Truth: Confusion and Confirmation Bias ................................................................................................................................. 157
Kevin Krahenbuhl, Middle Tennessee State University, United States

Preservice Science Teacher Preparation Using Virtual Reality ........................................ 162
Richard Lamb & Elisabeth Etopio, University at Buffalo, United States

Online Tutoring: Exploring Pre-Service Teachers to Serve Rural/Native Area Students ............................................................................................................................. 168
Hsing-Wen Hu, Grant Sasse & Katie Walker, University of Alaska Anchorage, United States

Stop, Collaborate, and Listen: Facilitating Community, Connection, and Communication in the Online Classroom ............................................................................. 173
Susie Gronseth & Jingyuan Fu, University of Houston, United States

Faculty Resistance to Technology Integration ........................................................................ 175
Ileana Torres & Jessica Evans, TCSPP, United States; Michael Schneider, TSCPP, United States

Teaching How to Visualize the Invisible: Using Virtual Reality to Expose the Microscopic World of Chemistry ..................................................................................... 178
Mia Kim Williams & Dalal Alrmuny, University of Northern Colorado, United States

Technology-facilitated Formative Assessment .................................................................... 182
Natalie Johnson-Leslie, Arkansas State University, United States; Lan Li, Bowling Green State University, United States; Valentina Grion, University of Padova, Italy; Lara Kassab, San Jose State University, United States

Reciprocal Teaching and Padlet: Writing about Reading with Slovakian Students Learning English .......................................................................................................................... 189
Victoria Seeger, Northwest Missouri State University, United States; Sara Worsfold, Currently working at a school in Cambodia., United States

Articulating and Applying Content using Student-Identified Video Clips .......................... 191
Paula Christensen, Northwestern State University of Louisiana, United States

Makerspace Professional Development: A Self-determination Theory Analysis ................................................................................................................................. 197
Michael L Schad & Monty Jones, Virginia Commonwealth University, United States

Technology Binds or Blinds? - Social Networks through a Pedagogical Lens ................. 205
Tami Seifert, Kibbutzim College of Education, Technology, and Art, Israel
The Effectiveness of a Game about Learning Disabilities ................................................. 211
Carol Redfield, St. Mary's University, United States; Crystal Redfield, John Jay Science and Engineering Academy, United States

Practice and policy in K-12 online learning in New Zealand: What lessons are transferrable? ........................................................................................................................................... 238
Keryn Pratt, University of Otago, New Zealand; Sandra Williamson-Leadley, University of Canterbury, New Zealand

Boosting Communication: Using Point of View (POV) Video for Students with Disabilities as a Powerful Communication Piece with Parents .................................... 241
Cassidy Hall, University of Idaho Doceo Center, United States; Ricky Mullins, Eastern Kentucky University, United States; Aleksandra Hollingshead, University of Idaho, United States; Tonia Dousay, University of Idaho Doceo Center, United States

Using UDL-related methods in education, teacher training, and job-development for young women with developmental disabilities in India ................................................ 245
Susie Gronseth, University of Houston, United States; Elizabeth Dalton, Rhode island, United States; Boris Alvarez, Irma Iglesias & Paola Vergara, Fellow Group, Chile; Jeanne Carey Ingle & Heather Pacheco-Guffrey, Bridgewater State University, United States; Debra Bauder & Katherine Cooper, University of Louisville, United States; Cindy Anderson, Roosevelt University, United States; Kevin Anderson, University of Michigan, United States; Vivian Intatano, Raja Soliman Science & Technology High School, Philippines; Peggy Semingson & Kathryn Pole, University of Texas-Arlington, United States; Kerry Armstrong, Brenda Boreham & Terri Mack, Strong Nations, Canada; Lisa Harris, Winthrop University, United States; Dave Edyburn, University of Central Florida, United States; Janet Arndt, Gordon College, United States; Britt Tatman Ferguson, National University, United States; Nili Luo, Southwestern College, United States; Lindsay Yearta, Winthrop University, United States

Language Teachers’ Content-Specific Technology Integration Reflection through the Video-Embedded Reflective Inquiry Model ................................................................. 250
Ai-Chu Elisha Ding, Ball State University, United States

Building a Framework for Project Based Personalized Learning ................................................. 255
Brandie Shatto & Randy Hansen, University of Maryland University College, United States

Building Digital Learning Culture into Pre-service Teacher Education ......................... 261
Ismail Guven, Ankara University Faculty of Educational Sciences, Turkey; Yasemin Gulbahar, Ankara University, Turkey

Using Digital Tools to Increase Authenticity and Access in Performance-Based Assessment and Project-Based Learning ................................................................. 270
Kristina Doubet & Eric Carbaugh, James Madison University, United States

Measuring K-12 Computational Thinking Concepts, Practices and Perspectives: An Examination of Current CT Assessments ................................................................. 275
Catherine Adams, Maria Cutumisu & Chang Lu, University of Alberta, Canada
Girls Who Code: The Importance of Contributing to Their Future ............................................. 286
Lisa Baylor, Walsh University, United States

Design and Development of a Graduate Online Course to Prepare Teachers and School Librarians to Lead Computational Thinking in K-12 Contexts ......................................................... 290
Kimberly Huett, University of West Georgia, United States; Bruce Neubauer, Albany State University, United States

Computational Thinking in Action: Paving the Way for Pre-service Teachers ........................................... 296
Nadia Jaramillo, Tyanez Jones & Brittany Sweers, Iowa State University, United States

Infusing Computing Through Professional Development: Shifts in Content Area Teachers’ Understandings of Computational Thinking Integration ........................................... 302
Robin Jocius, Jennifer Albert & Ashley Andrews, The Citadel, United States; Veronica Catete & Yihuan Dong, North Carolina State University, United States; Deepti Joshi & Richard Robinson, The Citadel, United States; Tiffany Barnes & Nicholas Lytle, North Carolina State University, United States

Children’s Perceptions of Participation in Programming Workshop with Their Parents .......................................................... 306
Yukiko Maruyama, Tokai University, Japan

Examining the difficulties of computational concepts and practices undergraduates encounter in an online learning environment ................................................................. 310
Hyunchang Moon & Jongpil Cheon, Texas Tech University, United States; SunGwan Han, Gyeong-in National University of Education, Korea (South)

Characteristics and Challenges of Japanese Computer Science Education in Elementary Level ........................................ 316
Michiyo Oda & Tatsuya Horita, Tohoku University, Japan

Applications of Computational Thinking to Solve Graph Problems ......................................................... 324
Gerard Rambally, University of North Texas at Dallas, United States

Infusing Computational Thinking Instruction into Elementary Mathematics and Science: Patterns of Teacher Implementation ....................................................... 330
Kathryn Rich & Aman Yadav, Michigan State University, United States

A Model for Integrating Computational Thinking into an Undergraduate Preservice Teacher Education Course ................................................................. 335
Kristina Tank & Dennis Culver, Iowa State University, United States
Discourse Practice of Computational Thinking ............................................................. 341
Sasha Wang & Yu-hui Ching, Boise State University, United States; Steve Swanson, Boise State University, United States; Youngkyun Baek, Dazhi Yang & Bhaskar Chittoori, Boise State University, United States

Integrating computational thinking in elementary classrooms: Introducing a toolkit to support teachers. ................................................................. 347
Aman Yadav, Rachel Larimore, Kathryn Rich & Christina Schwarz, Michigan State University, United States

Computational Pedagogical Strategies to Help Learners Retain STEM Content Knowledge ........................................................................................................ 351
Osman Yasar, Peter Veronesi, Jose Maliekal & Leigh Little, State University of New York College at Brockport, United States; John Tillotson, Syracuse University, United States

Examining the Effects of Digital Fabrication in Middle School: Comparing Gifted and Non-Gifted Students ........................................................................ 361
Vince Moore, Breckenridge ISD, United States; Tandra Tyler-Wood, University of North Texas, United States

Blogs as an Effective Social Media Tool in Education .................................. 367
Emad Abu-Shanab, Qatar University, Qatar; Nawzat Alsmadi, Yarmouk University, Jordan

Using Online Education to Improve Traditional Classroom Instruction: A Blended Learning Approach ........................................................................ 374
Catherine Bacos & Karen Grove, University of Nevada, Las Vegas, United States

Piloting a QM-Inspired Quality Assurance Process for All Online Course Offerings at a Mid-sized University ................................................................. 380
Savilla Banister, Rachel Vannatta & Cindy Ross, Bowling Green State University, United States

Bringing Open Pedagogy to Practice in a Blended Graduate Course: Affordances and Challenges .................................................................................. 386
Evrim Baran & Dana AlZoubi, Iowa State University, United States

Accommodating in the Online Course Environment for Students who are Deaf/Hard of Hearing ........................................................................ 391
Terence Cavanaugh & Suzanne Ehrlich, University of North Florida, United States

Nudging, Not Shoving: Five effective strategies for motivation and success for online learners .................................................................................. 398
Terence Cavanaugh & Nicholas Eastham, University of North Florida, United States
Student-Generated Discussion Activity: A Lever for Building a Community of Learners in an Asynchronous Online Learning

Beomkyu Choi, Grand Valley State University, United States

How Do e-Learning Students Perceive Online Synchronous Instruction: A Scaling Tool

Christina Churchill, University of North Texas, United States

Best Practices for Teacher Educators to Address Digital Security Issues in Synchronous Sessions and Webinars

Elizabeth Dalton, URI; Dalton Ed Services International, United States; Susie Gronseth, University of Houston, United States

How can we design online courses that are effective for student learning? (Roundtable)

Antoinette Marie Davis, Colorado State University-Global Campus, United States

Blurring Lines: Using Telepresence for Instructional Equity

Veronica Ent, Saint Vincent College, United States

Big space, small groups: Lessons learned on the development of a small-group learning classroom to meet the needs of both large- and small-enrollment courses

Christopher Faulkner, Robert Rege & Dorothy Sendelbach, UT Southwestern Medical Center, United States

Think You Know What Learners Want in an Online Class? Think Again.

Jennifer Graham, Northern Maine Community College, United States; Lynne Manion, Eastern Maine Community College, United States

A mixed methods research proposal to examine the influence of external factors and expectations on the success of first time online learners.

Alexis Guethler, Towson University, United States

Tools for Seamless Teaching in Online and Hybrid Contexts

Amanda Hurlbut & Karen Dunlap, Texas Woman’s University, United States

Exploring Asynchronous Online Learner Experiences and Perceptions

Alicia Johnson, Kenneth Potter & Emily Bishop, Virginia Polytechnic Institute and State University, United States

Maintaining a Competitive Edge: How Trends Drive Innovations for Online Education in Higher Education

Hong Lin, University of Oklahoma, United States
