TABLE OF CONTENTS

Panel on Computational Thinking/Computer Science Education K-12 Schools – Pedagogical Strategies, Supports, and Initiatives ............................................................. 1
Gerald Ardito, Pace University School of Education, United States

Bee-Bot for Computational Thinking: An Artifact Analysis .............................................. 2
Parama Bhattacharya & Mathew Brown, Indiana University, Bloomington, United States

Teaching Innovation in Higher Education: A Multidisciplinary Class ......................... 8
Samy El-Tawab, Nathan Sprague & Michael Stewart, James Madison University, United States

Conceptualizing Computational Thinking Pedagogical Content Knowledge: An Exploratory Study ............................................................................................................... 14
Cassandra Gaul & Min Kyu Kim, Georgia State University, United States

Making Computer Science Education Accessible to Rural Middle School Female Students: A Conceptual Framework ................................................................................................................................. 24
Cory Gleasman, Tennessee Tech University, United States; Alex Fegely, Coastal Carolina University, United States; Cale Koester, Tennessee Tech University, United States

Computational Thinking and other Emergent Practices in Student Reflections on Makerspace Activities ......................................................................................................................... 29
Jennifer Houchins, Cansu Tatar & Kevin Oliver, North Carolina State University, United States

Bearscode: The Blueprint of a Robotics and Programming Summer Camp ................. 38
Haihong (Helen) Hu & Donna Wake, University of Central Arkansas, United States

Using the Engineering Design Process to Teach Computational Thinking .............. 41
Lorraine Jacques, Louisiana Tech University, United States

Elementary teacher perspectives on a blended computational modeling and ecosystem science curriculum ......................................................................................................................... 46
Soobin Jeon & Shari Metcalf, Harvard Graduate School of Education, United States; Amanda Dickes, Gulf of Maine Research Institute, United States; Christopher Dede, Harvard Graduate School of Education, United States

Integrating Process Oriented Guided Inquiry Learning (POGIL) into a Computer Science classroom ................................................................................................................................. 56
Michael Jonas, University of New Hampshire at Manchester, United States

Middle Science Computing Integration with Preservice Teachers ............................... 63
Lauren Margulieux, Georgia State University, United States; Aman Yadav, Michigan State University, United States
Teaching Block-based Programming: A Systematic Review of Current Approaches and Outcomes

Hyunchang Moon, Jongpil Cheon & Jaehoon Lee, Texas Tech University, United States

A Qualitative Study Exploring Robots as a Potential Teaching Tool for Computational Thinking in a Sixth-Grade Classroom

Carol Munn, New Jersey City University, United States

The Effectiveness of Summer Professional Development for K-8 Computer Science Teachers

Gwen Nugent, Ke-ting Chen & Leen-Kiat Soh, University of Nebraska-Lincoln, United States

Integrating Computational Thinking into Teacher Education through an Unplugged Robot Design Lesson

Jillian Powers, Florida Atlantic University, United States; Mohammad Azhar, Borough of Manhattan Community College, The City University of New York, United States; Lisa Gustinelli, St. Vincent Ferrer School, United States

Examining Pre-service Teachers’ Ability to Incorporate Computational Thinking into Lesson Plans: A Comparison of Two Digital Technologies

Scott Sheridan, Bataul Alkhateeb & Chrystalla Mouza, University of Delaware, United States

An Exploration of a Mathematics Teachers Concerns Enacting Project-Based Instruction

Tod Shockey, Charlene Czerniak, Thehazhnan Ponnaiyan, Ahmad Javaid & Jared Oluoch, University of Toledo, United States

Physical STEM+C: Supporting the Integration of K-12 STEM+C Concepts in Non-Traditional Subject Areas

Debra Sprague, Risto Marttinen, Michael Eagle, Nancy Holincheck, Tareque Mehdii & Maurine Kwende, George Mason University, United States; Amy Riggio, Loudon County Public Schools, United States

Utilizing Visual Coding to Develop Computational Thinking and Literacy Practices

Meredith J. C. Swallow & Kathryn Will, University of Maine Farmington, United States

The Design and Implementation of Computational Thinking Skill-transfer Assessment for Kindergarten

Meiling Wang, Xiaohua Yu & Jiamin Cheng, East China Normal University, China

Building Computational Thinking Through Teachable Machine

Haoyue Zhang, Sara McNeil, Susie Gronseth, Bulent Dogan, Erwin Handoko & Lydia Ugwu, University of Houston, United States
