# TABLE OF CONTENTS

Cost-Benefit Analysis of a Constructivist Based Education Technology Initiative in India ........................................................................................................................................ 1  
*Uchita Bakshani, Tata Institute of Social Sciences, India; Amina Charania, Tata Institute of Social Sciences, India*

Online Learning Through the Eyes of Students with Limited English Proficiency ........................................................................................................................................ 8  
*Taylor Davis & Geneva Tesh, University of North Texas, United States*

Fostering Diversity, Equity, and Inclusion in Online Classes .......................... 15  
*Galia Fussell & Michelle Bianco, Purdue University Global, United States; Gulnur Polkina, Naberezhnye Chelny State Pedagogical University, Russian Federation*

Using Academic Writer to Develop Students’ Writing and Research Skills ........... 20  
*Galia Fussell & Michelle Bianco, Purdue University Global, United States; Gulnur Polkina, Naberezhnye Chelny State Pedagogical University, Russian Federation*

Teaching Employability Skills to Arabic-speaking Migrants: Instructional Designer Perspectives ........................................................................................................................................ 25  
*Amelie Hanna, Flinders University, Australia*

Are Middle School Students from a Lower Socioeconomic Background at a Disadvantage in the Online Learning Environment? ...................................................... 31  
*Jennifer Hunsucker & Eric Marvin, Union University, United States*

Exploring the Connection Between Universal Design for Learning and Culturally Responsive Teaching: Community, Choice, and Support for Diverse Learners through Different Teaching Modalities ................................................................. 40  
*Kerrigan Mahoney & Elizabeth Harsma, Minnesota State University, Mankato, United States*

Understanding the teacher participation and interaction over technology-enabled CoP ....................................................................................................................................... 44  
*Sumegh Paltiwale & Amina Charania, Tata Institute of Social Sciences, India*

Tech-savvy redlining: Understanding technology’s role in educational segregation ........................................................................................................................................ 49  
*Jalesa Parks, Austin Peay State University, United States*

Crowd-Sourced Wisdom for International Students: Differences Between Academic and Non-Academic Social Q&A ........................................................................................................................................ 53  
*Hon Jie Teo & Fangyang Shen, New York City College of Technology, United States*
Preserving Native American Language Through Mobile Learning ......................................... 59
Stephanie Tubby, University of North Texas, United States

Teaching virtually using multi-application to overcome digital divide during the COVID-19 pandemic ................................................................. 65
Nyarai Tunjera & Agnes Chigona, Cape Peninsula University of Technology, South Africa

Teacher Perceptions of Native Science During an Indigenous Virtual STEM Camp ................................................................. 79
Luke Ziegler, Leigh Martin & Jonathan D. Cohen, Georgia State University, United States

Are Current PK-12 Teaching Practices Preventing Students From Gaining Needed Technology Skills? ................................................................. 85
Bryan Artman, University of Nebraska Kearney, United States

Successful Integration of technology into the Composition classroom through the use of Bloom’s Digital Taxonomy. .................................................. 87
Michelle Bianco & Galia Fussell, Purdue University Global, United States

Technology-assisted Grading and the Real Three C’s of Composition. ................. 92
Michelle Bianco & Galia Fussell, Purdue University Global, United States

And then there was SAMS: Improving Digital Literacy Through the use of a Hybrid Application .................................................................................. 96
Zarina Charlesworth, University of Applied Sciences & Arts of Western Switzerland // HES-SO, Switzerland; Shaban Shabani, University of Applied Sciences & Arts Western Switzerland (HES-SO), Switzerland

A Curriculum for Implementing Inquiry-Based Learning of Science in an Online Environment .................................................................................. 103
Suparna Chatterjee, Arkansas Tech University, United States; Paige Wheeler & Stella Otoo, New Mexico State University, United States

Exploring Cybersecurity Education at the K-12 Level .................................................. 108
Weiru Chen & Yuming He, Old Dominion University, United States; Xin Tian, Kennesaw State University, United States; Wu He, Old Dominion University, United States

Vocabulary Learning Through Games on the e-Platform ............................................. 115
Shu Chen-Worley, Touro College, United States

Supporting Teacher Educators as They Grow in Academia & Teaching Practice: A Whole-Community Approach .................................................. 118
Teresa Coffman, University of Mary Washington, United States
Open Textbooks: A systems approach using the AMBER framework .......................... 124
Thompson Cummings, St. George's University, Grenada

African American Women and their Perceived Barriers to Attaining Leadership Positions .......................................................... 130
Tadzia Dennis, Taz & Co Consulting, United States

Angela Elkordy, National Louis University, National College of Education, United States; Jack Denny, Ayn Keneman & Donna Wakefield, National Louis University, United States

Student Collaboration Made Easy With Online Tools .................................................. 139
Maria Esposito & Justina Zendrian, Molloy College, United States

Student Media Organizations: Creating a supportive environment for all parties ...................................................................................................................... 141
Lacey Fulton & William Adams, Clarion University of Pennsylvania, United States

CTE Pathways: Integration of College and Career Preparation Programs to Increase STEM Career Interest Among High School Students ..................................................... 145
Jorge Garcia, University of North Texas, United States

Bridging the Gap Between Conceptual Knowledge and Professional Practice: A Discussion on Helping Students Build Relational Ways of Knowing and Being to Navigate New Practice Environments ................................................................. 152
Scott Gerrity, College of the Rockies, Canada

A Stages of Concern Survey Report of Findings on Educator Technology .................. 157
Kolleen Homuth, Central Michigan University; College of Education; Teacher Education and Human Services, United States; Ray Francis, Central Michigan University College of Education Teacher Education and Human Services, United States

The Impact of an Online IPE Curriculum Unit on Dietetic Students’ Thinking Regarding A Dietitian’s Role in Healthcare .................................................................................. 175
Kelly Jackson & Terri L. Kurz, Arizona State University, United States

Application of the Facial Expression Recognition System for the Emotional Analysis of Pre-service Teachers in Teaching Simulations ......................................................... 181
Chaeyeon Kim & Jeeheon Ryu, Chonnam National University, Korea (South)
The Effect of College Students' Mindset on Mastery Goal Orientation: The Mediating Effect of Failure-Tolerance

XiaoYu Liu, SunAn Choi, DoHwa Kim & Jumi Lee, Chonnam National University Gwangju, South Korea, Korea (South)

Development of Industry Collaborations to Create Authentic Learning Experiences

Star Matteson, SUNY Oswego, United States

An Early Childhood Engineering Instructional Model

Lauren Menard, Grand Canyon University, United States

Leadership in Technology: One Educational Preparation Program's Journey for Teaching Educational Technology to Teacher Candidates

Samantha Mrstik, Georgia Gwinnett College, United States; Rebecca Cooper, Georgia Gwinnet College, United States; Jillian Schreffler, Sacred Heart University, United States

Academics and Beyond: Social-Emotional and Trauma Informed Professional Development for Pre-service Teachers

Kelly ONeal-Hixson, Melissa Gerleman & Jennie Lauber, Emporia State University, United States

Gamification Elements in the Classroom: A Review

Keri Phillips Christensen, University of North Texas, United States

Educational Technology Use in Early-Childhood Classrooms: Influence of Teacher Characteristics on Implementation

Angela Plut, Katy Independent School District, United States; Jana Willis, Michelle Giles, Michelle Peters & Orange Amy, University of Houston-Clear lake, United States

Don't be Fearful of Feedback: Evaluations That Produce Change in Teaching Strategies and Course Content

Mary Risacher & Sara Fier, Southwest Minnesota State University, United States

An Investigation of TPACK Using the Scenario Technique: The Case of a Misconception Related to the Derivative-Limit Relationship

Zeynep #ahin & Hatice Akkoç, Marmara University, Turkey

The Role of Technology in Mathematics Teachers' Approaches to Overcoming a Misconception Related to the Graphical Understanding of Derivatives

Zeynep #ahin & Hatice Akkoç, Marmara University, Turkey
