Online Teacher Education Students Solving Education Problems using Computational Thinking to Create Accessible Robot Designs .......................................................... 67
Ann Musgrove & Jillian Powers, Florida Atlantic University, United States; Mohammed Azhar, Borough of Manhattan Community College, CUNY, United States; Cristine Yao, Florida Atlantic University, United States

Analysis of K–12 Computer Science Curricula From the Perspective of a Competency-Based Approach .............................................................. 75
Michiyro Oda, Graduate School of Information Sciences, Tohoku University, Japan; Yoko Noborimoto, Graduate School of Teacher Education, Tokyo Gakugei University, Japan; Tatsuya Horita, Graduate School of Information Sciences, Tohoku University, Japan

Characteristics of High and Low Performing Students’ Computational Thinking Facets Based on Structural Topic Modeling .......................................................... 80
Eunsung Park & Jongpil Cheon, Texas Tech University, United States

Reference Framework for Modeling in Practice: Potentials and Challenges for Teachers ............................................................................................. 86
Marina Rottenhofer, Heike Demarle-Meusel & Barbara Sabitzer, Johannes Kepler University, Austria

esports as a Strategy to Teach Computational Thinking: Designing an Online Gaming Tournament .......................................................................................... 96
Joe Sanchez, City University of New York - Queens College, United States; Jennifer Moore, University of North Texas, United States

Creating Music through Coding .................................................................................. 102
Jo Watts & Rachel Gibson, The University of Virginia, United States; Monty Jones, Virginia Commonwealth University, United States; Glen Bull, The University of Virginia, United States; N. Rich Nguyen, University of Virginia, United States

How Users Seek Computational Thinking Resources on Teachers-Pay-Teachers: A Review-Based Content Analysis .............................................................. 103
Fan Xu, Jiarui Xie & Ana-Paula Correia, The Ohio State University, United States

Algorithmic Social Justice through Participatory Action Research: Media Binds or Blinds? ................................................................................................. 110
Melda Yildiz, NYIT, United States

Computational Thinking and Geospatial Intelligence in Teacher Education: Transdisciplinary Approach .............................................................. 117
Melda Yildiz, NYIT, United States

Hero Journey Storytelling as Formative Assessment Collaboratives ........................................... 126
Susan Elwood & Tricia Boyson, Texas A&M University Corpus Christi, United States; Misty Kesterson, Texas A&M University-Corpus Christi, United States
Enhancing Online Teaching and Learning with Videos ................................................ 131
Tian Meng, Virginia Tech, United States; Shuyan Wang, The University of Southern Mississippi, United States

What a Magical Little Stone: A Case of Interactive Digital Storytelling Design for K-12 Children .............................................................................................................................. 136
Qi Si, Department of Education, East China Normal University, China; Yong Zhou, Institute of Global Chinese Language Teacher Education, East China Normal University, China

Factors Influencing Student Engagement in Virtual Classrooms and Their Impact on Satisfaction ........................................................................................................................ 142
Daniah Alabbasi, King Saud University, Saudi Arabia

An exploration of a flexible pathways learning design for EFL language learners ........................................................................................................................ 152
Ezequiel Aleman, Universidad Tecnológica del Uruguay, United States; Rossana Mantaras, Universidad Tecnológica del Uruguay (UTEC), Uruguay

Exploring the Practices, Challenges, and Benefits for Blended Learning across Four European Countries in the COVID-19 Era ................................................................. 156
Charoula Angeli, George Papadopoulos & Christos Mettouri, University of Cyprus, Cyprus; Martin Brown, Dublin City University, Ireland; Anthony Kilcoyne, Professional Development Service for Teachers, Ireland; Roger Austin, Ulster University, Ireland; Antoine Gambin, VisMedNet, Malta

Creating Global Partnerships Using Virtual Instructional Rounds in Teacher Preparation Programs .............................................................................................................. 164
Rebecca Birch & Elizabeth Truesdell, Dominican University, United States

Comparing Students’ Performance in a Face-to-Face Course and an Asynchronous Online Course on Educational Statistics ................................................................. 168
Li-Ting Chen & Leping Liu, University of Nevada, Reno, United States

A deep dive into asynchronous online discussion: examining whether students with different online listening behavior patterns feel learning satisfaction in asynchronous online discussion differently ................................................................. 175
Beomkyu Choi, Grand Valley State University, United States

The Impact of Discussion Forums in Learning and Applying Content ......................... 181
Paula Christensen & Jarrod Sanson, Northwestern State University of Louisiana, United States
Humanize the online learning environment to motivate, support, and retain first generation, socioeconomically diverse students, and students from varying cultural groups in higher education .......................................................... 187
Shernette Dunn, Florida Atlantic Uni, United States

Students’ Perceptions of Active Engagement in a Virtual Learning Environment: Implications for Abrupt Migration to Remote Teaching During COVID-19 Global Pandemic ............................................................... 193
Abdulsalami Ibrahim, Millersville University, United States

An Investigation of the Effects of Foreign Language Classroom Anxiety and Technology Anxiety on Performance in College Chinese Language Online Classrooms in the U.S.A. ............................................................... 200
Xiaona Jin & Lih-Ching Chen Wang, Cleveland State University, United States

Best Practices with Online Advising in Higher Education: Tools, Techniques, and the Future ............................................................... 205
Lisa Krall, Jessamay Pesek, Lisa Schmitz & Miriam White, Bemidji State University, United States

A Rubric: Indicators of Quality Design for Online Courses ............................................................... 211
Fatima Makda & Reuben Dlamini, University of the Witwatersrand, South Africa

The Development of Japanese Language e-learning system focusing on CLIL (Content Language Integrated Learning) suitable for DX education ............................................................... 219
Shizuka Nakamura, Graduate School of Science and Technology Shinshu University, Japan; Katsumi Wasaki, Faculty of Engineering Shinshu University, Japan

WebLive – Students’ Perspective on Hybrid Learning ............................................................... 224
Richard Pierce, Yavapai College, United States

Learning through Case Studies in Online Teacher Education: How Reflection and Revisiting Cases Can Make a Difference ............................................................... 229
Jillian Powers, Patricia Willems, Ann Musgrove & Alyssa Gonzalez-De Hass, Florida Atlantic University, United States

Developing a Model for Determining Return on Investment of eLearning: A Literature Review ............................................................... 238
Aubrey Taylor Rieder, University of North Texas, United States

Using Micro-credentials and Digital Badges in Education and Training: A Literature Review ............................................................... 246
Aubrey Taylor Rieder, University of North Texas, United States
Role Ambiguity Among Secondary Teachers ................................................................. 252
Emily Starrett, Arizona State University, United States

Factors of Student Satisfaction in Online Teacher Education Programs ..................... 257
Eunjoon Um & Veronica Szczygiel, Fordham University, Graduate School of Education, Online Learning Team, United States; Yimeng Li & Xueyi Luo, Fordham University, Graduate School of Education, United States; Lynn Hooley, Fordham University, Graduate School of Education, Online Learning Team, United States

Online Learning Platforms during the Pandemic: Application Status and Developments .................................................................................................................... 262
Jinyu Wang & Xiaohua Yu, East China Normal University, China

Professional Development Gone Remote: Analysis of In-Service Teacher Beliefs about the Implementation of Ambitious Science Teaching Practices and Science Teaching Self-Efficacy through a Workshop Delivered on Zoom ........................................ 272
John Williams & Daniel Mourlam, University of South Dakota, United States

Factors Influencing Learners’ Continuance Intentions Toward MOOC Platforms: The Study of Chinese University MOOC Platform ............................................. 278
Yumeng Zhou, Qing Yu & Huiying Ouyang, East China Normal University, China

Culturally Responsive Pedagogy for Practice and Use of Technology with STEM Courses .......................................................................................................................... 288
Katie Baleja, Wayne State University, United States

Reskilling and Upskilling Women in Emerging Technologies for the Future of Work ................................................................................................................................. 293
Elodie Billionniere, Miami Dade College, United States; Farzana Rahman, Syracuse University, United States

Design and Development of an Online Professional Development Course on Culturally Responsive Pedagogy Using the ADDIE Model .................................. 299
Crystal Bundrage & Kathleen Mapson, Georgia State University, United States

Social Justice and Equity in a Diasporic Digital Global Society: Freirean Concepts and Student Well-being ......................................................................................... 308
Maria Elena Rosario Dickerson, University of Texas at El Paso, United States; Cesar Rossatto, University of Texas El Paso, United States

Leveraging NASA Assets to Develop STEM Identity in Traditionally Underrepresented Populations ........................................................................................................ 316
Leslie Huling, Texas State University, United States
Reflecting on the Intersection of Bias and Research Design in Educational Technologies
Yi Jin, Kennesaw State University, United States; Mary Rice, University of New Mexico, United States; Kathleen Howe, Park University, United States; Lisa Dieker, University of Central Florida, United States; Marie Heath, Loyola University Maryland, United States

Young adults, movies, and trauma: Educating pre-service teachers about trauma informed practices
Jennifer Laffier & Madison Westley, Ontario Tech University, Canada

More Equitable Digital Learning Environments by Design: Teacher Inquiry into Student Learning
Tabia Lee, De Anza College, United States

Contending with Multiple Frameworks: Best Practices in Designing Accessible, Equitable, and Inclusive Online Learning Experiences (V)
Kerrigan Mahoney, Minnesota State University, Mankato, United States; Julie Marsh, College of William and Mary, United States

Improving Teaching and Learning in Poor Communities: Allocation of Technological Resources based on Equity and Need, Not Affordability
Mabel Okojie, Mississippi State University, United States; Tinukwa Boulder, Pittsburg University, United Kingdom

Scholarly Paper: Meeting LGBTQ Needs
Isabel Pittman, National University, San Diego, United States

Teaching Inclusive Teaching Strategies: A Game-Influenced Approach
Mike Reese & Reid Sczerba, Johns Hopkins University, United States

Project TRAIL: Increasing Law School Attendance Through Technology
Tandra Tyler-Wood, University of North Texas, United States

Hope Whiteside & Bernadette Beavers, The University of Alabama, United States

Documenting Inequities: Social Action Research and Augmented Reality
Emily Zuccaro, Eastern Kentucky University, United States; Ricky Mullins, University of Virginia-Wise, United States
Beginning Teachers’ Reflections on Pre-service Technology Training and Sense of Preparedness
Emmanuel Abedi & Sarah Prestridge, Griffith University, Australia; David Geelan, The University of Notre Dame, Australia

Professional Development Processes of Teachers in Different Career Stages and in Different Covid-19 Pandemic Periods
Orit Avidov-Ungar, Achva Academic College, Israel; Shlomit Hadad, Tamar Shamir-Inbal & ina Blau, The Open University of Israel, Israel

Theoretical Model and Analytical Framework of School-based Teacher Research?from the Perspective of Shared Regulation
Xinrui Cai, Tianyi Zhang & Xiangdong Chen, East China Normal University, China

Building a multi-tier Maturity Model for introducing Challenge Based Learning. Implications for teachers’ professional development
Leonie Chapel, University of Twente, Netherlands; Koen DePryck, University of Twente / Vrije Universiteit Brussel, Belgium

Using the Challenge Based Learning Maturity Model (CBL-MM) as a quick scan to support teaching innovation.
Koen DePryck, Rianne Kaptijn, Leonie Chapel & Luuk Buunk, University of Twente, Belgium

IDEA Lightning Rounds: Professional Development in Instructional Delivery, Engagement, and Assessment (IDEA)
Susan Elwood & Kelli Bippert, Texas A&M University Corpus Christi, United States; Tricia Boyson & Lynette Solis, Texas A&M University-Corpus Christi, United States

Case Study: Transition to Remote Teaching During the COVID19 Pandemic
Lucretia Fraga, Susan Hall & Kathy Bottaro, University of the Incarnate Word, United States

Implementing Professional Learning Programs to Support Teachers to Teach Students with Disabilities
Pankaj Khazanchi, Liberty University/ Cobb County School District, United States; Rashmi Khazanchi, The Open University of the Netherlands/ Mitchell County School System, United States; Smita Tiwari, Amity University, India

Professional development and its’ role for higher education instructors’ TPCK, self-efficacy and technology adoption as well as their technological and didactical implementation of distance teaching during the COVID-19 pandemic.
Daria Olden, Jessica Gröninger, Manon Henrich, Aileen Schlichting, Ingo Kollar & Klaus Bredl, University of Augsburg, Germany
Transformative Learning in Online Faculty Development: Active Learning, Critical Reflection and Social Discourse, and Implementation as Critical Elements in Achieving Transformative Change 433
Michelle Read, Texas State University, United States

Beyond Announcements: A Conversation on Having Regular and Substantive Interaction in Online Courses 440
Candace Ryder, Mia Kim Williams, Colby Gull & Curtis Biggs, University of Wyoming, United States

Design and Implementation of An Online CV Dossier System That Works for Faculty Members & Administration 443
Zafer Unal, University of South Florida, United States

Teaching about Control Flow Statements with Computer Games: Effects of Cognitive Differences on Secondary Education Students' Learning 451
Charoula Angeli & Katerina Tortouri, University of Cyprus, Cyprus

A Pilot Study: Can Elementary School Students Learn A Second Language and Cultural Awareness in An Immersive Video Game? 460
Tinukwa Boulder, University of Pittsburgh, United States; Ahmed Yousof, East Stroudsburg University, United States; David Parrott, Odin Eye’s Immersive Games, United States

Using Digital Simulation to Address Implicit Bias in Teaching 477
Rhonda Christensen & Gerald Knezek, University of North Texas, United States

Using Virtual Simulations in Teacher Education to Develop Equitable Teaching Strategies 484
Rhonda Christensen, University of North Texas, United States; Garron Hillaire & G.R. Marvez, Massachusetts Institute of Technology, United States; M. Elizabeth Azukas & Diane Holben, East Stroudsburg University of Pennsylvania, United States; Sue Gregory, University of New England, Australia; Susan Ledger, University of Newcastle, Australia

Gamification for Training in Organization 489
Fu-Ling Chung, University of North Texas, United States

Escape The Mundane: Motivating Students Through Educational Escape Rooms 493
Michelle Claypool & Jennifer Weible, Central Michigan University, United States

Teachers’ Use of Educational Technology and Web Adventures: Innovative Interactive Digital Media for Learning Science 502
Adem Eknekci & Anne Papakonstantinou, Rice University, United States; Paul Varner, Varner, Paul L. - Sole Proprietor, United States; Mahtob Aqazade, Rice University, United States
Cross-Cultural Experiences in Video Game Development Projects with Collaborative Online International Learning (COIL) (V) ................................................................. 508
Miguel Garcia-Ruiz, Algoma University, Canada; Laura Sanely Gaytan-Lugo & Pedro Santana-Mancilla, University of Colima, Mexico

Video Games in the English Language Arts Classroom: Strengths and Concerns According to Preservice Teachers ................................................................. 514
Hillary Gould & Sam von Gillern, University of Missouri, United States

An Exploration of Developing Digital Learning in K-5 Education ................................. 520
Kuei-Hui Hsiao & Paul E. Resta, The University of Texas at Austin, United States; Jhao-Yin Li, National Taiwan University, Taiwan

Learning to Develop an Instructional Game in Interactive Python .............................. 525
Ken Luterbach, East Carolina University, United States

Relationships between Students’ Use of Gestures and Learning Outcomes in Digital Math Games .......................................................... 528
Allison Roxburgh & Patricia Moyer-Packenham, Utah State University, United States; Emma Bullock, Sam Houston State University, United States

An Examination of Preservice Teachers’ Attitudes on Game-based Learning ................................................................. 533
Sam von Gillern, University of Missouri, United States; Carolyn Stufft, Berry College, United States; Hillary Gould, University of Missouri, United States

Preservice Teachers’ Experiences with and Attitudes about Video Games .................... 539
Sam von Gillern & Xinhao Xu, University of Missouri, United States; Carolyn Stufft, Berry College, United States; Hillary Gould, University of Missouri, United States

Video Games in the Elementary English Language Arts Classroom: An Examination of How Gaming Activities Can Support Learning ........................................... 545
Sam von Gillern, Hillary Gould & Alex Urban, University of Missouri, United States

Using a 2D Action-Adventure Game to Teach Computing History ............................... 551
Paul A Walcott & Jarod Rock, The University of the West Indies, Cave Hill Campus, Barbados

A pilot study of impact personalized role-playing game (RPG) environment on learning performance and mental effort (V) ........................................................ 557
Lin Zhong, Southern Illinois University Carbondale, United States
Effect of a personalized role-playing-game (RPG) environment on students’ learning efficiency and mental efficiency ................................................................. 562
Lin Zhong, Southern Illinois University Carbondale, United States

Examining the Effect of Game Elements on Graduate Teachers' Attention in Programming Education ................................................................. 565
Shuyun Zhou, Liang Cheng & Xue Li, East China Normal University, China

Playing in a Virtual Orchestra: A Collaborative Online Maker Project Integrating Arts for Inservice Teachers ................................................................. 571
Heejung An, William Paterson University of New Jersey, United States; Woonhee Sung, The University of Texas at Tyler, United States

Developing 21st century competencies: the rise of coding courses in Business Schools ......................................................................................... 580
Delphine Billouard-Fuentes, Em Lyon business school, France

Using Online, Collaborative Projects To Internationalize A Social Studies Teacher-Education Program ................................................................. 584
Cory Callahan, The University of Alabama, United States

Teaching Transcultural Understanding: Augmented & Virtual Reality Narratives in Foreign Language Curriculum ................................................................. 588
Betul Czerkawski, University of Arizona, United States

Developing 21st century skills through Challenge Based Learning Building teacher’s awareness of Executive Functions in Higher Education ................................................................. 592
Koen DePryck, University of Twente, Belgium; Ilse Wambacq & Julian Keenan, Montclair State University, United States

Perceptions, Learner Characteristics, And Preferences Of Limited Literacy Moroccan Women: The Feasibility Of Acquiring Darija Literacy Skills Through M-Learning ................................................................. 598
Nada El Maliki & Klaus Schmidt, Illinois State University, Morocco

Methods of Applying POGIL Principles To Upper-Level Courses: a Case Study on a Senior Capstone Course ................................................................. 605
Michael Jonas, University of New Hampshire at Manchester, United States

Engage, Motivate, Excite with Gamification! ................................................................. 611
Anita Knox, University of North Texas, United States
A Project-Based Learning Approach to Designing a Senior Capstone Projects Course-Series for an Information Computer Technology Program .................................................. 617
Charles Lesko, East Carolina University, United States

Design and Methods for Creating Microlearning Contents in Teacher Education Online Courses .......................................................................................................................... 626
Leping Liu & Wenzhen Li, University of Nevada, Reno, United States

Not The Bells and Whistles: Re-authoring Lesson plans for Online Instruction .......................................................................................................................... 632
Anjli Narwani, University of Michigan, United States; Kevin Miller, The University of Michigan, United States

Beyond Traditional Programming: Assessing Middle School Students Makerspace Experience ......................................................................................... 636
Stella Otoo & Thomas Korang, New Mexico State University, United States; Paige Wheeler & Suparna Chatterjee, STEM Outreach Center, New Mexico State University, United States

Integrating Experiential Learning in Middle School Computer-Based Simulations ........................................................................................ 641
Stella Otoo & Lauren Cifuentes, New Mexico State University, United States

Assessing the faculty member’s intention to adopt accessible online course design using Web Accessibility Acceptance Model (WAAM) ........................................ 644
Shiva Pourgholaminejad, Leping Liu & Wenzhen Li, University of Nevada Reno, United States

The Instructional Designer’s Training Guide: Authentic Practices and Considerations for Mentoring ID and Ed Tech Professionals ........................................ 654
Rebecca Reese, Rocky Mountain College of Art and Design, United States; Jill Stefaniak, UGA, United States

Digital Reading Workshop: An innovative method for promoting active learning in higher education ................................................................. 656
Marit Rismark & Astrid Sølvberg, Norwegian University of Science and Technology, Norway

A Pilot Study to Identify Evidence-based Technology-enhanced Teaching Patterns in Pre-service Teacher Education ......................................................... 661
Nadine Schlomske-Bodenstein & Bernhard Standl, Karlsruhe University of Education, Germany

You want me to do what, by when? The positive and negative aspects of designing, building, and implementing a new online degree program ........................................ 667
Alicia Shaw, Annette Hux, Robert Williams, Jackie McBride, Kimberley Davis & Allen Hays, Arkansas State University, United States
Study on Improving Nursing Safety Education ......................................................... 671
Takashi Tachino, Tamagawa University, Japan; Anthony Madden, Kanda Institute of Foreign Languages, Japan; Yuko Nagashima, Komazawa Women’s University, Japan

Transdisciplinary Teaching and Learning are the Lessons of Today ..................... 676
Juliana Tauschinger-Dempsey, Scholars Academy for the Gifted and Artistically Elite, United States; Laura Lowder, Pfeiffer University Division of Education & Scholars Academy for the Gifted & Artistically Elite, United States

Flipped Classroom Lesson Design & Evaluation Rubric ............................................ 682
Zafer Unal, USF St. Petersburg, United States

Significant Learning for Health Sciences Students .................................................. 691
Katie Williams & Melissa Dittberner, University of South Dakota, United States

Integrating Online CURE to Engage Students in Computational and Statistical Thinking ................................................................. 695
Li Xu, University of Arizona, United States

Application of Project-Based Collaborative Learning in a University Seminar Class to Improve Students’ Problem-Solving Ability ................................................................. 701
Yibo Xue & Dandan Gao, East China Normal University, China; Zhifeng Liu, Central China Normal University, China

Study on the Appropriateness of the Design, Use and Removal of the Instructional Scaffoldings in Programming Teaching - Take Python crawler programming teaching as an example ................................................................. 708
Keyi Yuan, Fang Wen & Jiabin Zhao, Department of Educational Information and Technology, East China Normal University, China

Development of Robot Education Curriculum Based Maker Education in Micro:Bit ................................................................. 718
Ting Zhang & Bo Jiang, East China Normal University, China

Effects of Brain Breaks on Students’ Perception of Engagement by Gender ................................................................. 727
Salma Ali, Texas A&M: College of Education, emphasis on Techn, United States

Pandemic Pedagogy: Lessons from the Canadian Context .................................... 731
Michael Barbour, Touro University California, United States; Randy LaBonte, Canadian eLearning Network, Canada

K-12 Online Learning Issues of Marginalized Populations in the U.S. during the Covid-19 Pandemic ................................................................. 741
Hannah Chung, Harvard University Secondary School Program, United States; Nari Kim, University of Wisconsin-Oshkosh, United States
Social Presence Amid Physical Distance: Best Practices for K-12 Online Teaching and Implications for Teacher Professional Development .......................................................... 749
April Fleetwood, Florida Virtual School, United States; Lodi Lipien, FlexPoint Education Cloud, Florida Virtual School, United States

Rural Elementary Teachers’ STEM Teaching During COVID-19 ................................... 755
Katie L. Johnson & Nathaniel Largo, University of Nebraska-Lincoln, United States; Amanda Thomas, University of Nebras-Lincoln, United States; Amy Sokoll Bauer, University of Nebraska-Lincoln, United States

Promoting Deeper Discussions ....................................................................................... 761
Kevin Krahenbuhl, Middle Tennessee State University, United States

Investigating Minnesota Literacy Teacher Insights During COVID-19: Distance Learning, Hybrid, and In-person Instruction ................................................................. 767
Lisa Krall, Bemidji State University, United States; Kate Kelly, St. Catherine University, United States; Debra Peterson, University of Minnesota, United States; Wendy Richards, University of Northwestern, United States

Using SeeSaw to Promote Phonological Awareness in Primary Age Students .......................................................... 772
Mariah Kramer & Jennifer Weible, Central Michigan University, United States

Remote learning experiences when you prefer pen & paper over digital devices ............................................................................................................................... 776
Sanna Oinas, University Helsinki, Faculty of Educational Sciences, Finland; Risto Hotulainen, Centre for Educational Assessment, Faculty of Educational Sciences, University of Helsinki, Finland

Teachers, Students, and the Pandemic: How do we Move Forward? ......................... 782
Rebekah Piper, Lorrie Webb & Karen Kohler, Texas A&M University-San Antonio, United States

Design and validation of an instrument to measure teacher competencies for instruction in one-to-one learning environments .......................................................... 786
William Sadera, Towson University, United States

Which Pedagogical Strategies are Prevalent in Emergency Remote Teaching? Crosschecking Teachers and ICT Coordinators' Perspectives ............................................. 790
Tamar Shamir Inbal, Ina Blau & Shlomit Hadad, The Israeli Open University, Israel

Campus Leaders’ Use and Attitudes Towards Technology Impacted by COVID-19 .......................................................................................................................... 795
Norma Veguilla-Martinez, Katy Independent School District, United States; Antonio Corrales, Jennifer Grace & Michelle Peters, University of Houston - Clear Lake, United States
FazBoard an AI-Educational hybrid Teaching & Learning System ............................................... 800
Fawzi Benmessaoud & Louie Zhu, IU School of Informatics & Computing, IUPUI, United States

Undergraduate Students’ Perceptions of Interactive Instructional Videos ......................... 809
Liza Bondurant, Gray Kane, Maria Weber & Severine Groh, Delta State University, United States

An Investigation of Machine Learning-Based Plagiarism Detection in Computer Programming ..................................................................................................................................................... 814
Michael Cao & Wei-Fan Chen, The Pennsylvania State University, United States

Using Learning Analytics to Assess Student Success in Community College Open Educational Resource Biology Courses ................................................................. 818
Adronisha Frazier, Louisiana State University/Northshore Technical Community College, United States

Innovative Ways of Engaging Teachers through Virtual Coaching with the Early Literacy Learning Model .......................................................................................................................... 826
Vickie Johnston, Florida Gulf Coast University, United States

Monitoring of the Achievement Degree of Instructional Objectives Based on Learning Evaluation Data .......................................................................................................................... 832
Bilan Liang & Lingling Meng, East China Normal University, China

Differential Effects of Face-to-Face and Online Yoga Instruction on the Anxiety and Flexibility in College Students” ................................................................. 839
Robyn Miller, Bowling Green State University, United States; Judy Lambert, University of Toledo, United States

Can We Actually Measure Cognitive Cost?: A Self-Study on Cellphone Usage During the Pandemic .......................................................................................................................... 863
Brooke Mullins & Ricky Mullins, The University of Virginia’s College at Wise, United States

Your Brain on Learning: A Systematic Review of fMRI and EEG as Indicators of Learning Success .......................................................................................................................... 869
Aubrey Taylor Rieder, University of North Texas, United States

Navigated Learning: Teacher Use Profiles during Hybrid and Fully Remote Instruction .......................................................................................................................... 875
Calli Shekell, Educational Testing Service, United States; Michelle Newstadt, BrainPOP, United States; Prasad Ram, Gooru, United States

Preparing Current and Future Educators to be OER Creators and Curators .................................................. 880
Torrey Trust & Robert Maloy, University of Massachusetts Amherst, United States
Visual Design of Collaborative Learning Process ................................................................. 884
Yingying Zhao, Liang Cheng & Xiangdong Chen, East China Normal University, China

Were We In The Same Course? A Multi-Site Descriptive Study Investigating Faculty and Student Online Experiences and Perceptions Amidst the First Wave of the COVID-19 Pandemic ................................................................................................................................. 894
Shelley Cobbett, Dalhousie University, Canada; Patti Hansen-Ketchum, St Francis Xavier University, Canada; Nadine Ezzeddine, Dalhousie University, Canada; Debbie Brennick & Willena Nemeth, Cape Breton University, Canada

Utilizing the Kirkpatrick Evaluation Model in HIED Online Course Evaluation:
Perceptions from Instructors ........................................................................................................ 899
Dan Dao, Distance and Online Education-The University of Iowa, United States

What Does 25 years of WebQuest Research Tell Us? ........................................................... 908
Bernie Dodge, San Diego State University, United States

The Associations of Social and Motivational Factors to Science and Mathematics Teacher Retention ........................................................................................................................................... 914
Adem Ekmekci, Mahtob Aqazade, Anne Papakonstantinou, Betul Orcan & Jamie Catanese, Rice University, United States; Cynthia Callard, Cathleen Cerosaletti & Michael Daley, University of Rochester, United States; Greg Rushton & Joshua Reid, Middle Tennessee State University, United States; David Gibson & Karen Renzaglia, Southern Illinois University Carbondale, United States; Rebecca McGraw, University of Arizona, United States; Peter Sheppard, University of Louisiana at Lafayette, United States; Michelle Head, Kennesaw State university, United States; Guershon Harel & Osvaldo Soto, University of California San Diego, United States

Exploring Video Game Player Type and Grit Among Undergraduate Students .............................................................................................................................. 921
Karla Hamlen, Cleveland State University, United States

Positive Pedagogy and the Impact of Rapid Conversion to Online Learning: A Case Study ........................................................................................................................................... 925
Karla Hamlen, Cleveland State University, United States

A t(r)opical journey: Using text mining to explore teachers’ experiences in the Great Online Transition ................................................................................................................ 930
Sarah Howard, University of Wollongong, Australia; Jo Tondeur, Vrije Universiteit Brussel, Belgium; Nathanael Hutchison, University of Wollongong, Australia; Ronny Scherer, University of Oslo, Norway; Fazilat Siddiq, University of South-Eastern Norway, Norway

The Use of Learning Analytics to Corroborate Survey Responses ..................................... 936
Francisca Butac Marshall, Becky DeMartini & Justin Marshall, BYU-Hawaii, United States
Undergraduate Students’ Experiences with Online Microlearning through the Lens of Gagné’s Nine Events of Instruction ................................................................. 945
Laura McNeill, Bernadette Beavers-Forrest, Margaret Rice & Angela Benson, University of Alabama, United States

Scaffolding a Science Museum Exhibit through Signage ............................................. 951
Ross Ramsey, Mengyi Mao, Janice Anderson & Jill Hamm, The University of North Carolina at Chapel Hill, United States

A study on Software Evaluation of Chinese Adult English words ........................................ 960
Lingxia Shen, Hui Zhang, Rui Li & Yu Qian, East China Normal University, China

What predicts the use of parental strategies: Active mediation, technical monitoring, or restrictive mediation? ................................................................. 968
Rony Tutian, Maya Kalman-Halevi & Yehuda Peled, Western Galilee College, Israel

Web-based Practice Tests Predict Students’ Success on State Content Exams ................................................................. 972
Shahrzad (Sherry) Vafa & Moira Baldwin, University of Houston - Victoria, United States

Parental technology attitude, information literacy and students’ learning to learn: the moderating role of parental information perspective and parent-adolescent communication problem ................................................................................. 978
Fang Wen, Yiling Hu & Xiaoqing Gu, East China Normal University, China

Research on the Mechanism of Metacognition in Conceptual Change ............................. 987
Yangziqi Zhang & Zihong Zhao, East China Normal University, China

An inquiry of Pre-service teachers’ cooperative learning effectiveness in terms of learning efficacy and learning power ......................................................... 995
Jiabin Zhao, Department of Educational Information Technology, East China Normal University, China; Hongchao Peng, School of Open Learning and Education, East China Normal University, China

Digital Clinical Simulations to Advance Teacher Leadership at HBCUs ............ 1984
Alicia Lane & Anika Burtin, University of the District of Columbia, United States

Developing a Pedagogical Model for Immersive Virtual Reality in Teaching and
Learning ................................................................................................................ 1990
Anu Lehikko & Heli Ruokamo, University of Lapland, Finland; Mikko Nykänen, Finnish Institute of Occupational Health, Finland

Leveraging virtual simulations to increase collaborative practice in special education
teacher preparation ......................................................................................... 1995
Rebekah Louis, Stonehill College, United States
Exploring the Potential of an Online Suite of Practice-Based Activities for Supporting Preservice Elementary Teachers in Learning How to Facilitate Argumentation-Focused Discussions in Mathematics and Science ................................. 2000
Jamie N. Mikeska & Calli Shekell, Educational Testing Service, United States; Adam V. Maltese, Indiana University, United States; Justin Reich & Meredith Thompson, MIT, United States; Heather Howell, Educational Testing Service, United States; Pamela S. Lottero-Perdue, Towson University, United States; Meredith Park Rogers, Indiana University, United States

A Literature Review Analysis Exploring Online Educational Technology Techniques Utilized By Teachers Within The Last Five Years (2017-2021) ................................. 2011
Anne Mutiga, Leping Liu & Wenzhen Li, University of Nevada-Reno, United States

Pre-service Teachers’ Perceptions of the Effectiveness of Micro-credentialing of English Learner Teaching Skills (MELTS) ......................................................... 2018
Nicole Narkiewicz, Bonnie Swan, Leslie Mendez, Joyce Nutta, Kerry Purmensky & Florin Mihai, University of Central Florida, United States

Students Speak: This Matters to Me in an Online Course ........................................... 2026
Amy Paciej-Woodruff, Tammy Brown, Sandra Pesavento & Rachael Stevens, Marywood University, United States

How to Teach Economics: Lessons from a College Student Survey during COVID-19 ................................................................. 2032
Junpyo Park, University of Northern Colorado, United States

Lessons Learned in Teaching an Online Multicultural Education Course .................. 2042
Jessamay Pesek, Bemidji State University, United States

Hybrid and Digital Technology to Support Military-Connected Students in Teacher Education (V) ...................................................... 2045
Suzanne Porath & Dustin Meritt, Kansas State University, United States

Open Source Learning: A Workshop ................................................................. 2049
David Preston, Open Source Learning, United States; Gerald Ardito, Manhattanville College School of Education, United States

Research and design of the auxiliary teaching platform of ancient poetry for primary school students ...................................................... 2051
Yu Qian, Rui Li, Hui Zhang, Lingxia Shen & Yonghe Wu, East China Normal University, China

Impact of Curriculum on Interest and Aspirations of High School Students in Computer Science ................................................................. 2056
Yolanda Reimer, Computer Science DepartmentUniversity of Montana, United States; Michael Coe, Cedar Lake Research, United States
Neuroscience and Teaching: Using Digital Concept Mapping/Imaging to Create More Effective Learning ................................................................. 2062
Marilyn Rice & Kimberly LaPrairie, Sam Houston State University, United States

Shifting In-Service Teachers’ Perspectives and Skills Regarding Technology Integration: A Literature Review on Effective Personalized Online Professional Development ................................................................................................................................. 2065
Aubrey Taylor Rieder, University of North Texas, United States

A Process for Preparing AR Content to Create a Learning Experience .................. 2071
David Russo, University of North Carolina, United States

Reality in a Virtual World: Immersive Technology Applications for AR and VR .................................................................................................................. 2075
Parviz Safadel, Texas Tech University Libraries Informatics Media lab, United States; David White, Texas Tech University, United States

Faculty Attitudes and Knowledge Towards Information Technology ......................... 2082
Nelumndini Samaranayake, University of North Texas, United States

Emotional behavior in quantitative research methods course for preservice teachers. Learning analytics approach. ................................................................. 2089
Erkko Sointu, Mohammed Saqr, Teemu Valtonen, Susanne Hallberg, Sanna Väisänen & Jenni Kankaanpää, University of Eastern Finland, Finland; Ville Tuominen, Valamis, Finland; Laura Hirsto, University of Eastern Finland, Finland

Instructor’s and Students’ Perspectives on HyFlex Learning: A Collaborative Self-Study ........................................................................................................ 2099
Liyan Song, Emily Bailey, Jeremy Boettinger, Brocha Siff, Tolulope Oladipo, Lauren Santi, Tracy Boyd & Lauren Neimeyer, Towson University, United States

Best Practices of Teaching Coding Skills in Elementary Education ......................... 2102
Aubrey Statti & Kelly Torres, The Chicago School of Professional Psychology, United States

Preservice Teachers and Action Research in Virtual Reality ..................................... 2108
Heather Stefanski & Rebecca Callaway, Arkansas Tech University, United States

The Apocalypse Effect: Ubiquitous Technology Design in Low-Expectancy STEM Students ........................................................................................................ 2117
Torrence Temple, National University, United States
Preservice teachers’ pedagogical reasoning and technology integration: the case of the missing click

Ottavia Trevisan, University of Padova, Italy; Anneke Smits, Windesheim University of Applied Sciences, Netherlands

The Application of Successive Effective Teaching Strategies to Enhance the Digital Learning Experience

Richard Vranesh, University of Missouri System, United States

Using Word Clouds to Uncover Preservice Teachers’ Understanding of Computational Thinking in the Context of Teacher Education Coursework

Lien Vu & Bataul Alkhateeb, University of Delaware, United States; Megean Garvin, University System of Maryland, United States; Chrystalla Mouza, University of Delaware, United States

Promoting Students’ Online Interaction and Collaboration

Shuyan Wang, The University of Southern Mississippi, United States

The influence of analyzing own classroom videos or videos of other teachers during a teaching practicum on pre-service teachers’ professional vision of classroom management

Kira Elena Weber, IPN - Leibniz Institute for Science and Mathematics Education, Germany; Christopher Neil Prilop, Anna Holstein & Marc Kleinknecht, Leuphana University Lüneburg, Germany

K-12 teachers’ burning questions regarding online learning at the onset of a pandemic

Allyson Wilcox, University of West Georgia, United States

SimTEACHER: VR-based Simulation for Pre-Service Teachers

Eunbyul Yang, Kukhyeon Kim & Jeeheon Ryu, Chonnam National University, Korea (South)

Teaching elementary computer science with physical computing for linguistically diverse classrooms

Ezgi Yesilyurt, Weber State University, United States; Erdogan Kaya, George Mason University, United States; Refika Turgut, University of South Carolina Upstate, United States; Elif Adibelli-Sahin, Development Workshop, Turkey; Burak Sahin & Hasan Deniz, University of Nevada, Las Vegas, United States

The role of teachers’ orientation in the Context of Education empowered by Artificial Intelligence -- Based on Emile's teacher role view

Ting Zhang & Bo Jiang, East China Normal University, China

New Mexico Connected Communities Collaborative: Supporting and Strengthening School Communities During the COVID-19 Pandemic

Erika Acosta, Lauren Cifuentes, Stella Otoo & Germain Degardin, New Mexico State University, United States
Examining Teachers’ Perception of Developing 21st Century Skills through Science Education using TPACK-21 Framework ................................................................. 2189
Salma Ali, Texas A&M: College of Education, United States

Reimagining Practical Applications of the TPACK Framework in the New Digital Era ......................................................................................................................... 2192
Rebecca Blankenship, Florida Agricultural and Mechanical University, United States; Daniel Mourlam, University of South Dakota, United States; Ilene Berson & Michael Berson, University of South Florida, United States; Cheun-Yeong Lee & Li-Wei Peng, Governor's State University, United States; Yi Jin, Kennesaw State University, United States; Irina Lyublinskaya & Xiaoxue Du, Columbia University, United States; Melissa Warr, University of Louisiana-Monroe, United States; Punya Mishra, Arizona State University, United States; Mia Williams, University of Wyoming, United States; Tracey Hatfield, University of Louisiana Monroe, United States

Reimagining Practical Applications of the TPACK Framework in the New Digital Era ......................................................................................................................... 2198
Rebecca Blankenship, Florida Agricultural and Mechanical University, United States; Daniel Mourlam, University of South Dakota, United States; Ilene Berson & Michael Berson, University of South Florida, United States; Cheun-Yeong Lee & Li-Wei Peng, Governor's State University, United States; Yi Jin, Kennesaw State University, United States; Irina Lyublinskaya & Xiaoxue Du, Columbia University, United States; Melissa Warr, University of Louisiana-Monroe, United States; Punya Mishra, Arizona State University, United States; Mia Williams, University of Wyoming, United States; Tracey Hatfield, University of Louisiana Monroe, United States

Investigating contextual knowledge within TPACK: How has it been done empirically so far? ..................................................................................................................... 2204
Eliana Brianza, University of Zurich, Switzerland; Mirjam Schmid, University of Queensland, Australia; Jo Tondeur, Vrije Universiteit Brussel, Belgium; Dominik Petko, University of Zurich, Switzerland

Exploring changes in pre-service teachers’ self-perceived Technological Pedagogical Content Knowledge (TPACK) and design beliefs in an online summer educational technology program. ........................................................................................................ 2213
Xiaoxue Du, MIT Media Lab, United States; Irina Lyublinskaya, Teachers College, Columbia University, United States

Collaboration and Communication in Blended Learning ................................................. 2219
Maria Esposito, Molloy College, United States; Justina Zendrian, Molloy College and Jericho School District, United States

Conducting practice lessons online to foster student teacher’s skills in designing lessons that include ICT .................................................................................................. 2227
Kohei Hagiwara, Satoshi Kojima, Keito Kurahashi & Yasuhiro Morimoto, Tokyo Gakugei University, Japan

Developing Learning Activity Types for Theatre Education ........................................ 2235
Lisa Harris, Winthrop University, United States; Joy White, Riverside High School, United States; Emma Townsend, York Comprehensive High School, United States
The use of TPACK to support communities of practice develop their online teaching practices and implementation of student-centered learning pedagogies .......................... 2240
Carmen Miles, De Montfort University, United Kingdom

Course by Design in a TPACK Context: A Learner Centred Model for Designing Digital Instruction ........................................................................................................................ 2246
Julie Mueller & Ketki Yennemadi, Wilfrid Laurier University, Canada

Creating Innovative Teacher Education to Prepare Educators to Facilitate Learning in Innovative Schools .................................................................................................................. 2252
Cailen O’Shea, North Dakota State University, United States; Guy Trainin, University of Nebraska-Lincoln, United States; Laurie Friedrich, Concordia University-St. Paul, United States

Technological and Pedagogical Challenges for Teachers During Covid-19 .......................................................... 2259
Suzanne Reaid, Walden University, United States

In-service teachers find the value of doing math together utilizing web-based technology as part of a virtual professional development ......................................................... 2266
Amanda Reinsburrow, Sienna Medina, Mikhail Miller & Jason Silverman, Drexel University, United States

Computer Science as a Fundamental Discipline in Education ................................................................. 2271
Jennifer Rosato, College of St. Scholastica, United States; Michelle Friend, University of Nebraska-Omaha, United States; Mahnaz Moallem, Towson University, United States

Visualizations of Current and Aspired TPACK from In-Service Teachers ........................................ 2275
Daniel A. Tillman, Thomas J. Soto, Karine H. Smith & Song A. An, The University of Texas at El Paso, United States

Exploring the Influencing Factors of Teachers Ability for Using Tablet from the Perspective of TPACK .................................................................................................................. 2281
Haoen Yang, East China Normal University, China

Course Design in Canvas: Tips and Tricks from Veteran Online Instructors ................................................................. 2287
Jimmy Barnes & Kelly Paynter, Jacksonville State University, United States

Alisha Butler & Melissa Warr, University of Louisiana Monroe, United States
The Intersection of e-Folios Assessment and UDL Principles: Improving Student Engagement
Natalie Johnson-Leslie, Arkansas State University, United States; Aashna Khuarana, Lynch School of Education and Human Development, United States; Garron Hillaire, Massachusetts Institute of Technology, United States; Susie Gronseth, University of Houston, United States; Tracey Hall, Centre for Applied Special Technology (CAST), United States

Integrating the UDL Principle of Engagement to Enhance Asynchronous Online Participation
Laura King, Jennifer Williams & Lora Lee Smith Canter, East Carolina University, United States

Using the Engagement Principle of UDL in Pre-Service Teacher Preparation Programs
Loren Naffziger, Grand Canyon University, United States; Jessica Alvarado, National University, United States

Teacher Beliefs and Perceptions of Science Notebook use in a Universal Design Learning
Gelyn Roble, Alief Independent School District, United States; Jana Willis & Elizabeth Beavers, University of Houston-Clear Lake, United States; Michelle Peters, University of Houston-Clear Lake, United States; Amy Orange, University of Houston-Clear Lake, United States

Evaluating Pedagogy and Practice of Universal Design for Learning (UDL) in K-6 Classrooms
Jennifer Williams, Laura King & Lora Lee Smith Canter, East Carolina University, United States

Factors Facilitating and Impeding Online Learning in U.S. High-Needs K-12 Schools During the COVID-19 Pandemic: Experiences of Teachers, Administrators, and Parents
Heejung An & Geraldine Mongillo, William Paterson University of New Jersey, United States; Woonhee Sung, University of Texas at Tyler, United States; David Fuentes, William Paterson University of New Jersey, United States

Benefits of Asynchronous Tutoring in Online Writing Centers
Stephanie Dekok & Thillainatarajan Sivakumaran, Arkansas State University, United States

The Value of Providing Communities for Online University Students
